DETAIL 3

DETAIL 3

Due to the limitation of Bookshelf size, the linear led (we try to select the color of led to match xenon light color) to be proposed for this shelf

make or break a space; it helps define how we experience space, not just how we enhance it.

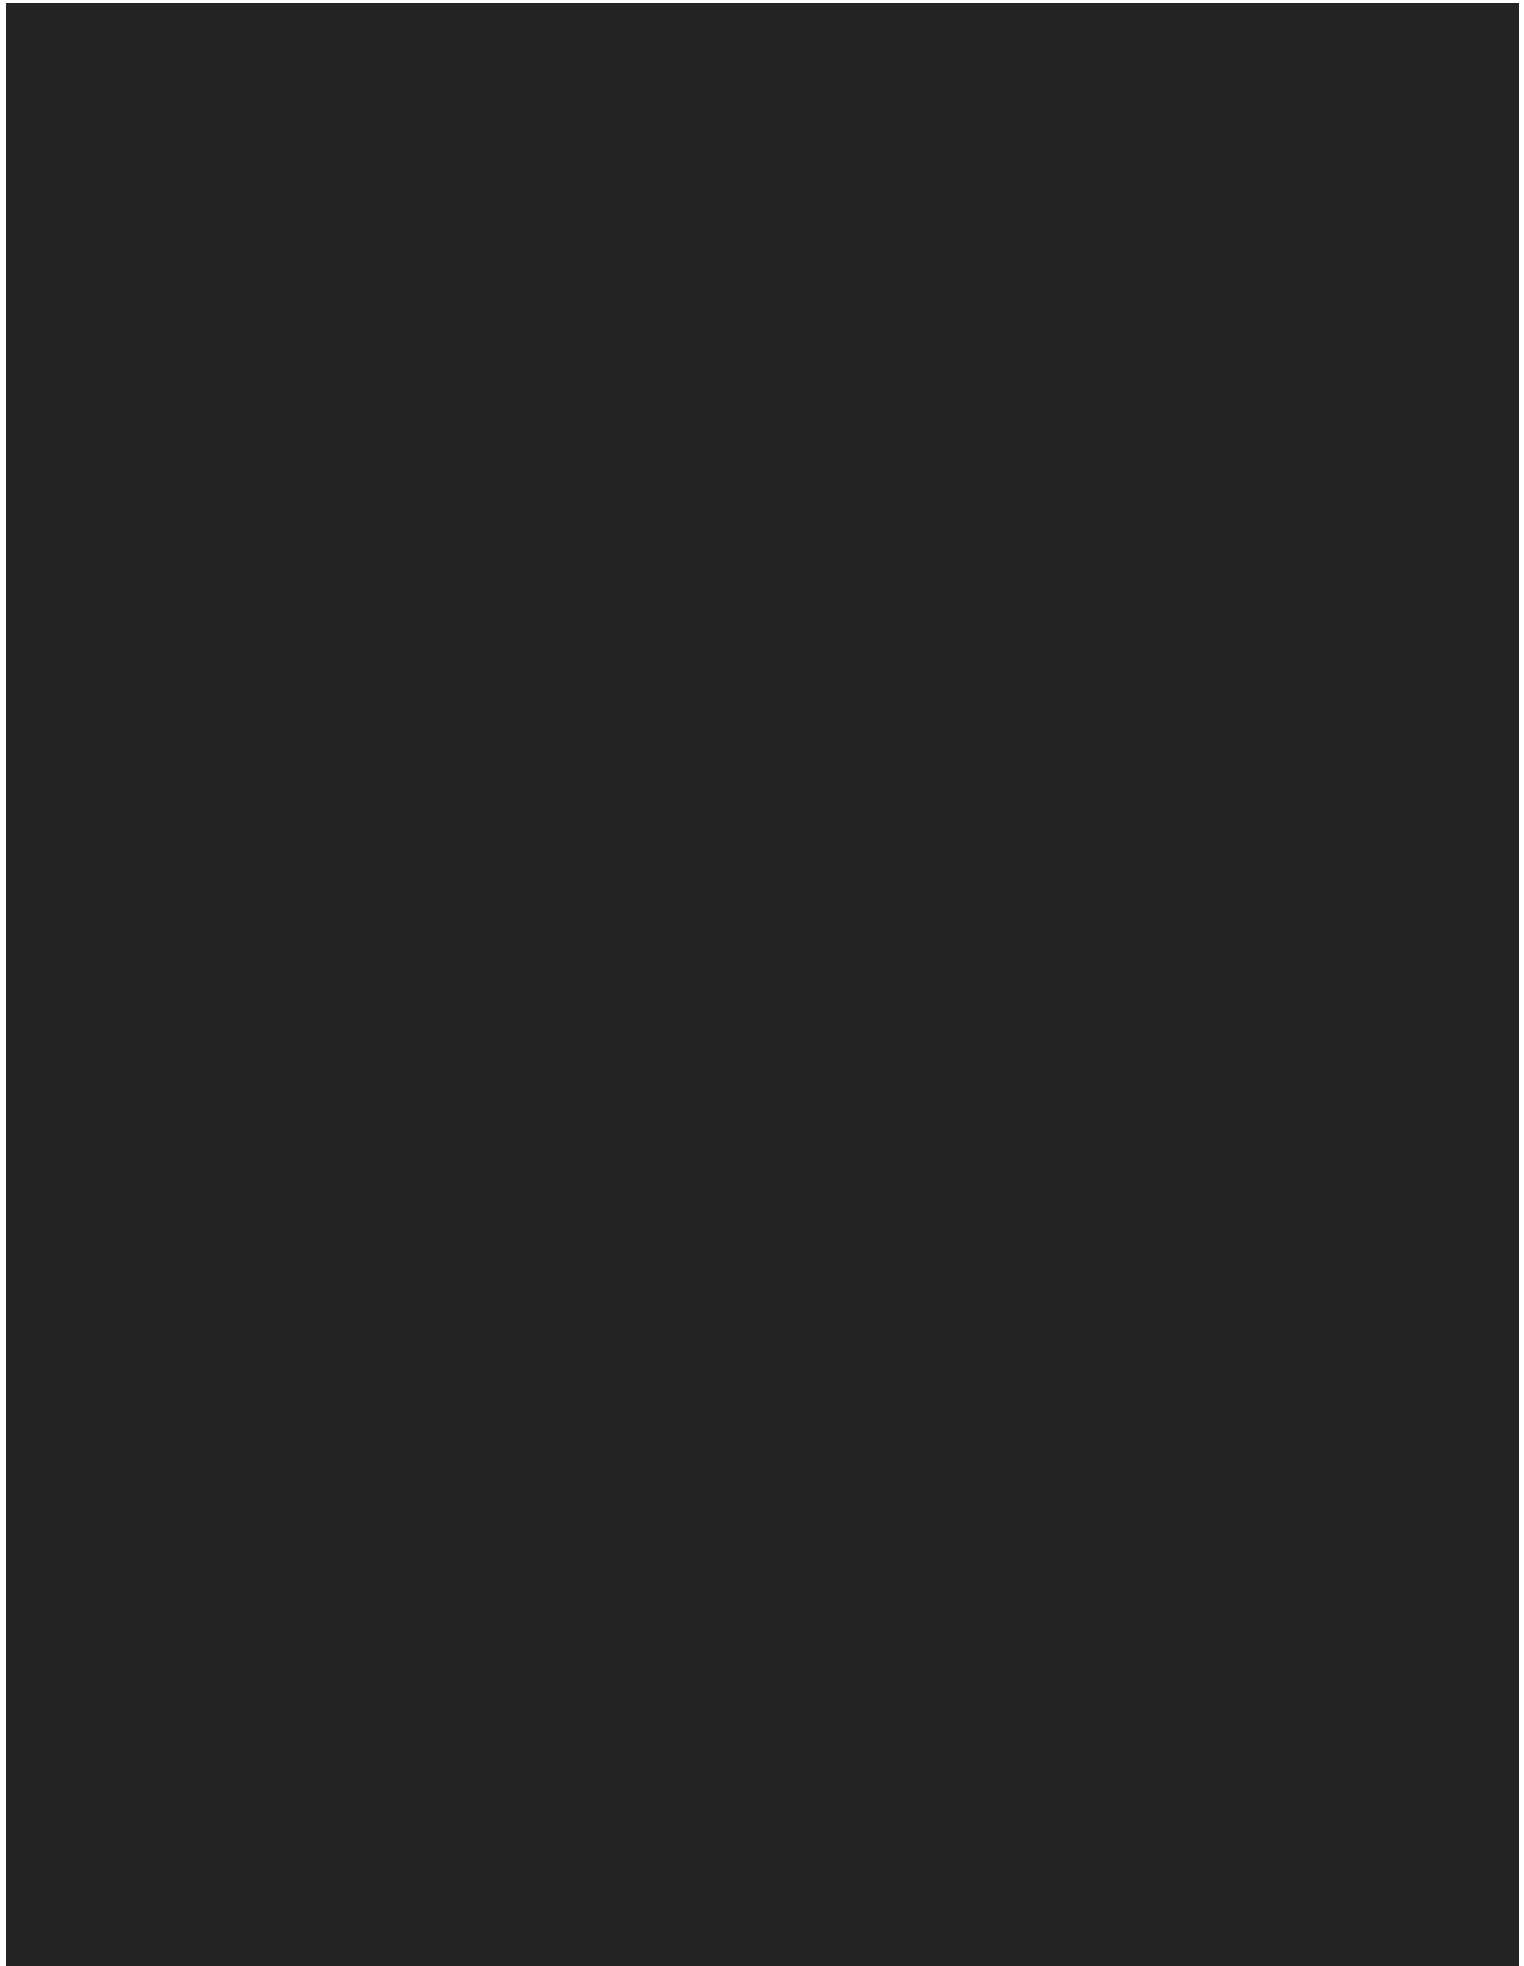

The use of lighting can be beneficial in many ways from creating relaxation in a spa for your customers to improve focus, attention and productivity in a work place. At Light Up Design, we fully understand the importance of good lighting design. We have established our own lighting design department to support the growing needs from our customers. Please do not hesitate to contact one of our staffs about our lighting design service.

Light is all around us...

with appropriate and proper lighting effect it can guide our mood and enhance our lives in many different ways. Good lighting can strengthen and highlight the structural features of a building to provide romance and warmth to the environment where you spend your quite time.

It contributed greatly to people's sense of well-being. Lighting can

Zinger Generation II

LIGHT UP in collaboration with  COLORS®

LINER LIGHTING SYSTEM

Let us proudly introduce our 2016 IF Design Award winning Zinger Generation II. Look for IF Design Award logo on several new models that received this award. Zinger Generation II is a revolution of the design and installation. Modularity technology brings us the free extending connection, efficiency installation and uncomplicated appearance.

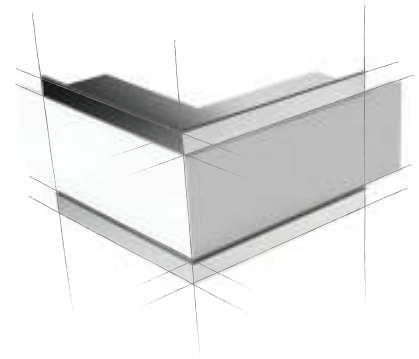

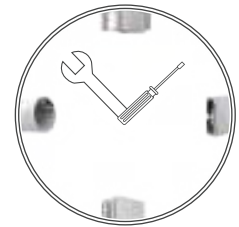

Brings More Freedom Design

Base on modular design and easy installation methods, Zinger Generation II has broken through the restrict of traditional lighting system, satisfy the imagination of designers, everyone is able to create the lighting space by his own ideas and individual application, fully present the combination of human being's characteristics and product's features. Let everyone enjoys the freedom of designing.

Brings More Easy Installation

Zinger Generation II brings amazing revolution of installation by keeping adopt the new technology. Compares to similar products from other place, Zinger Generation II significantly increases the efficiency of the installation by saving 40% time during the process of installation. The users will be able to finish his own design freely in a very short time by using Zinger Generation II

Brings Various Of Application

Standing out from the common led lights like led strip, led tube, Zinger Generation II combines with aluminum profile and led light source perfectly, various connectors offer more adaptability for different application field, different space construction, and different kind of decoration material.

Brings More Fashionable Geometry Style

Unlike the complex, luxurious European lighting style, Zinger Generation II adopts modern linear light, divides space into diverse of simplicity geometry, overturned the complex traditional lighting style, creates the new territory of fresh, elegant, fashion, becomes the most favorite designing style and sought after by large group and people.

Zinger Generation II

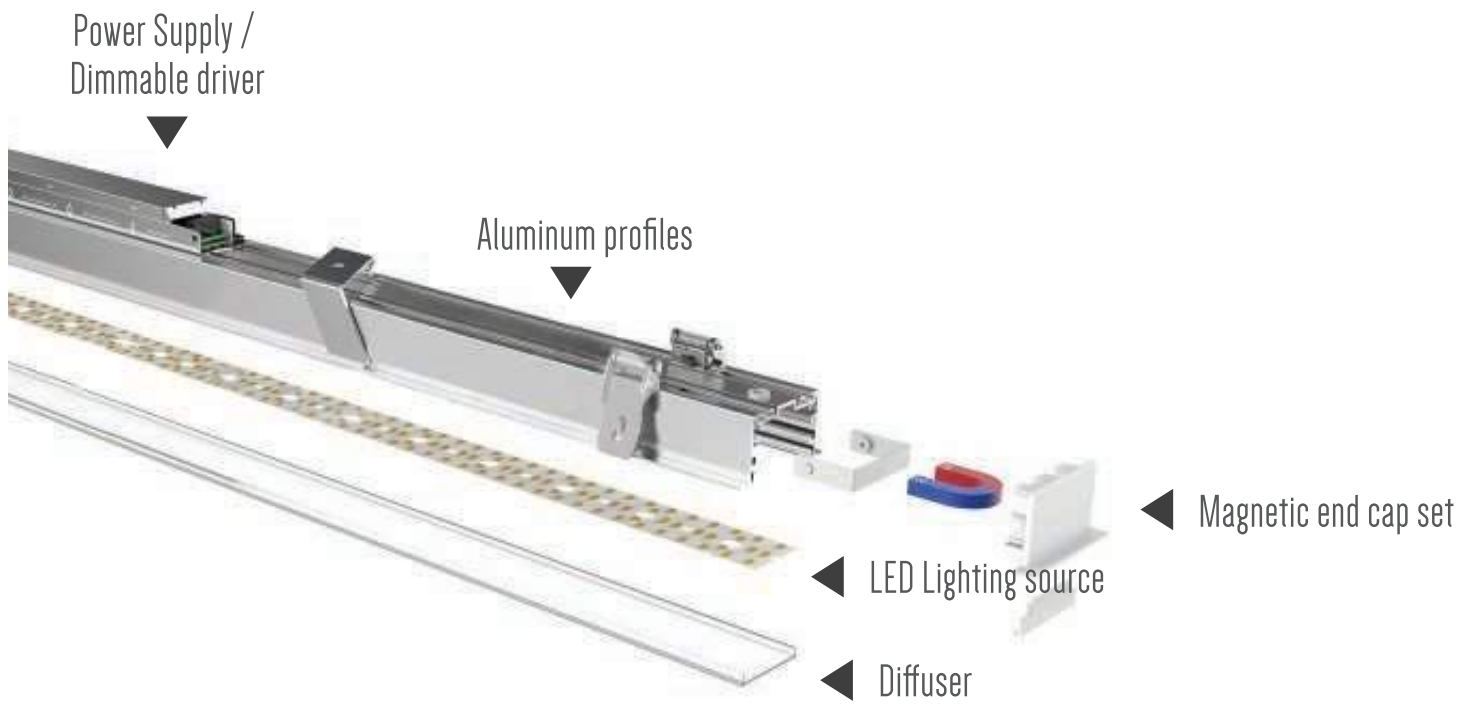

Innovative magnet end cap, easy installation without screws;

Multi-corner connectors are available: 180 ° straight, L-type, T-type, X-type;

Various of customized services: customized color, size, material and so on.

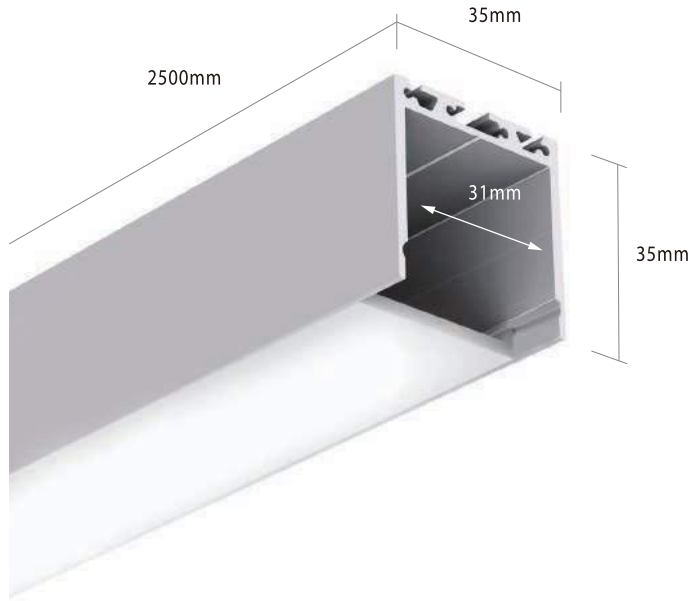

The size of profile and cover are exactly the same, no need space for end cap;

Recessed
Downlights

Cave series of consists of

recessed downlights

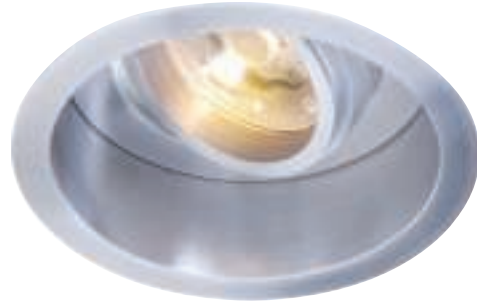

that are supremely designed to position the lamps deep inside the frame to minimize glare.

The beautifully unique appearance of Cave makes it one of our best selling downlight series. The frame and lamp base are made from top quality aluminum built for longer life span and surface is treated by dusting. With bulb option of MR16, it is suitable to be used in variety of areas and applications from general to where accent lighting is needed to showcase specific objects. Adjustable or fixed radiation angle are available in white and brush silver.

FLASH series

Flash series consists of several types of halogen downlights that are characterized by their flashy silver color highlighted by the stunning hairline texture of the aluminum frame. They are made from pure top quality aluminum built for longer lifespan and the surface is vanished after brushing. These flashy looking downlights will go well together with both light and dark colored ceiling. With bulb options of MR16 and G4, Flash series is suitable for all sorts of general areas including where accent lighting is desired for better mood and tone. Radiation angle is adjustable on most models and are available in brush silver.

OPTIMUS

Characterized by their well proportioned outer frames and adjustable feature on both axes, the Optimus series is everyone's favorite halogen recessed downlight. With beautiful dusted finish on its top quality aluminum surface built for longer lifespan, our Optimus series will surely elevate your ceiling appearance. Several bulb options are available for

different needs and requirements including MR16, QR111, and Metal Halide. MR16 halogen bulb option is suitable for general areas and where accent lighting is desired for better mood and tone. QR111 halogen bulb option is suitable for areas with higher ceiling preferably 3 - 4 meters or areas where high concentration of light is needed.

Metal Halide bulb option is suitable for areas where mood and tone is vital and very high concentration of light is required. Models in Optimus series are available in white and grey with options of single, double, and triple heads to choose from.
